PROFILE

IT audit and technology risk professional, CISA certified, with eight years directing PCI DSS and ISO 27001 audit remediation at bank scale and three years in Canadian financial services under federal and provincial regulatory conduct requirements. Holds a current Ontario OTL licence, with working depth across OSFI B-13 and B-10, PIPEDA and FSRA-regulated environments. Advises a payments intermediary on PCI DSS and ISO 27001 readiness and remediation. Hands-on ITGC testing across all four control domains: walkthroughs, risk and control matrix development, audit programs, control design assessment, tests of design and operating effectiveness, service organization reliance and complementary user entity controls. As primary interface between a major commercial bank and Visa and Mastercard, directed remediation and closure of 300+ audit findings, achieving closure acceptance by the card schemes and external assessors, coordinating control owners across IT, Information Security, General Services and HR. Building depth in AI governance (ISO/IEC 42001, NIST AI RMF).

CORE COMPETENCIES

- **Frameworks:** PCI DSS 4.0.1, ISO/IEC 27001:2022, SOC 1 / ISAE 3402, SOC 2, NIST CSF 2.0, NIST AI Risk Management Framework (AI RMF), OSFI B-13 and B-10, PIPEDA, ISO/IEC 42001 (AI management systems, building depth), ISO 8583 transaction messaging, Visa and Mastercard scheme requirements
- **Audit & Risk:** IT audit, Internal audit, ITGC testing, Audit planning and execution, Audit programs, Walkthroughs, Risk and control matrix (RCM), Control design assessment, Test of design and operating effectiveness, Technology risk assessment, Audit finding remediation and closure, Complementary user entity controls, Financial statement audit support, Third-party risk, Executive risk reporting, AI governance, Responsible AI, AI risk assessment
- **Platforms & Tools:** Auditi, ServiceNow, Jira, Power BI, SQL, Microsoft Sentinel, Microsoft Defender, KQL, Entra ID, AWS cloud security

EXPERIENCE

Meridax

Payments Compliance Advisor

Feb 2026 - Present

- Advise a payment intermediary on PCI DSS and ISO 27001 readiness and remediation, covering control documentation, evidence coordination and follow-up to closure on open compliance findings.
- Manage evidence collection and request tracking in Auditi.
- Map card scheme requirements to operating controls across merchant and acquiring bank relationships.
- Assess third-party and service provider oversight against OSFI B-10 expectations applicable to service providers of federally regulated financial institutions, including risk identification across downstream providers.
- Support technology and cyber risk practices aligned to OSFI B-13 and NIST CSF 2.0.
- Support SOC 2 readiness: Trust Services Criteria gap assessment, control design and evidence architecture.
- Advise on personal information handling and breach response obligations under PIPEDA.
- Maintain risk and incident tracking and report control status to company leadership.

Intact Financial / belairdirect

Specialist, Sales & Customer Service

Feb 2023 - Dec 2025

Licensed insurance role in a federally and provincially regulated environment. Handled personal and telematics client data under privacy obligations, worked within regulatory conduct, suitability and disclosure requirements, and documented client interactions to a standard supporting internal quality review and compliance monitoring. Contributed to assigned technology projects alongside the DevOps team, working in ServiceNow, Jira, Power BI and SQL. Ontario Other-Than-Life (OTL) insurance licence, current.

GigaNet

Independent Consultant, Payments Security

2020 - 2024

- Designed and documented software-based security controls for a PCI CPoC (Contactless Payments on COTS) solution, enabling merchants to accept contactless payments directly on standard smartphones and tablets without external hardware readers.
- Defined controls to protect the payment application from tampering, reverse engineering and runtime manipulation.

Network International

Independent Consultant

2019 - 2021

- Assessed the configuration and effectiveness of 3D Secure (3DS2) authentication protocols to reduce fraud while minimising friction for legitimate bank customers.

Learning Accelerate

Founder

2019 - 2022

Early-stage education technology venture. Company ceased operations in 2022.

First Bank of Nigeria Ltd

Head, E-Business Regional Support

2015 - 2019

One of Africa's largest banks. 11M+ cards issued (first Nigerian bank to reach the milestone), ~550 branches in Nigeria, 820+ business locations across Africa. Across both roles below, served as the bank's primary liaison to Visa and Mastercard on PCI DSS and ISO 27001 audit findings.

- Directed remediation and closure of 300+ PCI DSS and ISO 27001 audit findings, from receipt through evidence collection to closure acceptance by Visa, Mastercard and external assessors.
- Coordinated remediation across four functions, IT, Information Security, General Services and HR, securing owner assignment, target dates and evidence from teams outside direct reporting lines.
- Prepared and presented finding closure status to senior management, including ageing, overdue items and escalation of blocked remediation.
- Translated assessor findings into actionable requirements for technical and non-technical owners, and maintained the finding register and evidence set used to demonstrate closure.
- Led regional delivery for mobile money and digital banking products: 12 direct reports and 750+ indirect Trade Developers across marketing, sales and product support.
- Accountable for channel performance, field enablement and service quality across the branch and agent network.

Head, E-Business Services

2011 - 2015

- Led a 35-person function responsible for the bank's e-business and card services operations.
- Owned service delivery, issue resolution and card scheme compliance obligations across the payments estate.

PROJECTS

IT General Controls Testing - Simulated Engagement

2026

- Performed audit planning, scoping and ITGC testing over financially significant applications for a mid-size Canadian credit union scenario in support of a financial statement audit, where the core banking platform is hosted and operated by a service organization. Conducted walkthroughs, developed the risk and control matrix (RCM) and audit programs, and carried out control design assessment. Covered reliance on the service organization's ISAE 3402 / SOC 1 Type II report, identification and testing of complementary user entity controls, and treatment of the one-month gap between the report period and the client's year end. Documented test of design and test of operating effectiveness across access to programs and data, change management, program development and computer operations, with sampling rationale, exceptions and deficiency evaluation.
- Self-constructed scenario; no live environment assessed. Workpapers available on request.

Security Operations Investigation Portfolio walentino.github.io/signalroot

2026

- Four end-to-end incident investigations built in a self-constructed Microsoft 365 and Sentinel lab: AiTM sign-in compromise, business email compromise, token-replay controls and OAuth consent abuse. Covers detection logic, KQL queries, investigation methodology and reporting.
- Synthetic telemetry, self-generated; training environment.

CERTIFICATIONS

- CISA: Certified Information Systems Auditor · ISACA · Certified September 2026 · Certificate No. 268692 **2026**
- PMP: Project Management Professional (PMI)
- SC-200: Microsoft Security Operations Analyst · 2025 **2025**
- ISACA Member: Toronto Chapter
- SOC 2 Reporting: Wisdify, 2026 **2026**
- IT Audit and SOX Program: Techquest Hub, 2026 **2026**
